

Joel Font Llorà

Work experience

Freelance Site Reliability Engineer

AYKEnergy | August 2024 - Flex hours

- This company manufactures IoT-enabled ship batteries. I implemented from zero monitoring tools for their products using the ELK Stack and Grafana.

SysOps and DevOps Engineer

BCNC Group for Telefónica | February 2024 - Current

-Working in the log streaming department, managing millions of logs from thousands of applications, including VOD and IPTV systems. Experienced with technologies such as InfluxDB, the ELK stack, SQL, Kubernetes, Grafana, Apache Flink (Java and SQL), Linux, Fluent Bit, and Azure. Skilled in fine-tuning ETL pipelines to optimize performance and data processing efficiency.

Software Engineer - University Internship

Einnova | September 2023 - July 2024

-Working on a web application which final purpose is to reduce the time wasted in some daily processes for the workers

-Using Python (Flask) / Javascript (React). AWS (lambda, S3)

System Administrator & DevOps

Alten Spain for Stellantis Group. | March 2023 - February 2024

-Worked on a connected vehicle project, leveraging technologies such as Kubernetes, Helm, Docker, AWS, Ansible, Linux, Tomcat, and Oracle. Focused on creating and maintaining deployment pipelines for new releases developed by the team, ensuring seamless updates for highly critical connected vehicle applications that required 24/7 uptime

IT Support Technician L1/L2

SWHosting. | March 2022 - March 2023

-Level 1 and 2 incident resolution through ticketing tools.
